

ETIENNE NAMUR

[LinkedIn](#) | +33 642172243 | etienne.namur@epitech.eu | Los Angeles, CA

OBJECTIVE

Versatile & detail-oriented software engineering student with hands-on experience in systems programming, AI, and cybersecurity. Passionate about tech, I thrive at the intersection of data, security and low-level development. International background across France, Spain, Germany and the US. Seeking a full-time OPT position in Software Engineering from August 2026 to August 2027.

EDUCATION

Certificate in Data Analysis & Cybersecurity

UCLA | Los Angeles, USA

Sep 2025 – Jun 2026

Master in software engineering

Epitech | Berlin, Germany

Sep 2025 – Aug 2027

Baccalaureate Maths/Physics specialization

Lycée Notre-Dame Saint-Victor | Eprenay, France

Sep 2019 – Jun 2022

STRENGTHS AND EXPERTISE

- Programming: Skilled in Python (~30 projects), C/C++ (~40 projects), and HTML/CSS (~20 projects).
- AI & Data: Machine learning, data pipelines, statistical analysis, and analytics with Power BI and Excel/VBA.
- Cybersecurity: Network security, vulnerability analysis, secure coding practices, and CTF challenges.
- Tools: Docker, Git, Oracle, MySQL, Shell, Figma, Notion, Trello, Microsoft Suite, Canva.
- Languages (French - Native / English - C1 / German – B1)

PROFESSIONAL EXPERIENCE

Berner Becker – VBA and PowerBI developer

Berlin, Germany

Oct 2024 – Jul 2025

- Developed and automated revenue management reporting solutions using Power BI, Excel, and VBA, improving operational efficiency and data accessibility for hotel clients and internal teams.
- Designed interactive Power BI dashboards to visualize pricing, occupancy, and performance metrics, enabling faster and more data-driven decision making.
- Built automated Excel and VBA tools to centralize, clean, and structure revenue management data, significantly reducing manual reporting tasks.
- Collected, transformed, and integrated data from multiple hotel sources to ensure reliable and consistent analytical reporting.

AWARDS & CERTIFICATIONS

Recognized with 10 Encouragements for outstanding performance in key subjects such as Unix & C Lab, Mathematics, DevOps, and Project Management, highlighting a consistent track record of academic excellence. Awarded 2 Medals for exceptional achievements in C Graphical Programming and the Paradigms Seminar, reflecting strong technical skills and dedication to programming and problem-solving.

PROJECTS

AREA

Full-stack automation platform (IFTTT/Zapier clone) with REST API server, web client and mobile client, built with Docker Compose and OAuth2 integration.

Dynamic Game Engine

A C++ game engine for runtime loading of games like Snake, Pacman, with interchangeable interfaces and real-time switching.
